

How to build a cost-effective, remote server management solution

Racks & Enclosures

Applications

- Server rooms
- Data centers
- Industrial control centers
- Telecommunication closets
- Audio/Visual control centers

The StarTech.com Advantage

High Quality Construction

- Designed from maximum durability to ensure long-lasting, reliable operation

DuraRak Flat-Pack Cabinets

- Solid construction in an easy-to-handle package
- Perfect for rapid deployment to locations where a pre-built cabinet is difficult to install

Dependable Server Racks

- Form factors to suit any application from 42U fully enclosed, wall mount, and to 2 and 4 post open racks
- Choice of superior passive or active cooling designed to keep your equipment cool depending on your application
- Lockable side panels and doors increases security
- RS-310D design ensures compatibility with all standard rackmount equipment

LCD Rack Consoles

Applications

- Managing cabinet mounted servers
- Improving the internal space efficiency of existing cabinets
- Convenient solution for IT managers to control multiple computers and manage the setup, administration, and maintenance of rack-mount servers from a single console

The StarTech.com Advantage

Security

- A key lock prevents access to the keypad or LCD trays

Ultimate Efficiency

- Control multiple computers from one desktop/console
- Generates much less heat than CRT displays, reducing cooling requirements
- Steel construction/durability etc.

Space Saver

- Improves cabinet ergonomics by placing keyboard and display close together
- Requires 90% less space than a standard cabinet mounted keyboard, monitor, and mouse
