

ExpressCard to CardBus Laptop Adapter PC Card

StarTech ID: CB2EC

This ExpressCard to PCMCIA Laptop Adapter Card converts a laptop ExpressCard port into a PCMCIA CardBus port, allowing you to use older CardBus cards with a newer (ExpressCard capable) laptop computer.

Ideal for use with Ethernet LAN, Broadband, Modem, and other CardBus expansion cards, the adapter eliminates the expense of having to replace your existing CardBus cards for the sake of compatibility.

The adapter card supports common operating systems including Windows® XP, Vista™, and Mac OS X and up, and is backed by StarTech.com's 1 year warranty.

Applications and Solutions

- Great for use with Ethernet LAN, Broadband, Modem, and other CardBus expansion cards
- Make the most out of your ExpressCard slot. You can use this adapter to connect all of your existing CardBus cards without the hassle of having to replace them

Features

- Compliant with PC card standard 7.1 and PCI Express revision 1.0a
- Easy to use and install, no drivers required
- Fits into 34mm or 54mm ExpressCard slots
- Supports Type I/II PC cards and compatible with 32-bit CardBus cards.
