

1 ft USB to RS232 Serial DB9 Adapter Hub with COM Retention

StarTech ID: ICUSB232PRO

This innovative USB to Serial adapter offers a professional grade solution for connecting legacy or industrial RS232 serial devices to a laptop or desktop computer through USB - eliminating the expense of upgrading serial peripherals for compatibility.

A time-saving and convenient USB/Serial solution, the adapter retains assigned serial COM port values in nonvolatile memory, allowing the same values to automatically be assigned to the adapter serial port if disconnected and reconnected, or disconnected from one USB port and installed in another.

A versatile connectivity solution that bridges legacy serial peripheral devices with newer USB-capable computers, the USB to Serial adapter is compatible with Win98/2000/XP/Vista and MAC OS 10.4+ operating systems, and is backed by StarTech.com's 1-year warranty and free lifetime technical support.

Applications and Solutions

- Connect a serial modem, digital camera, or PDA with serial sync to an available USB port
- Connect bar code scanners and other serial devices to a USB port.
- Ideal for connecting serial devices to laptops or tablet PC's through an available USB port

Features

- COM port settings are retained for serial devices plugged into different USB ports
- Draws power from USB port. No external power needed
- Easy to setup and install
- Lightweight and portable cable is excellent solution for laptop or mobile application
- Provides dual buffers for upstream and downstream data transfer
- Supports automatic handshake mode
- Supports data transfer rates of up to 920kpbs
- Supports remote wake up and power management control

Technical Specifications

- Color: Black
- Connector Types: 1 - DB9 Male
- Connector Types: 1 - USB A Male
- Carton Quantity: 50
- Shipping (Package) Weight: 0.29 lb [0.13 kg]
- Hardware Requirement: A PC with an available USB 1.1 port
- Operating System: Windows 98 SE, ME, 2000, XP, Vista, Mac OS 10.4+
