

5.25in Bay Mounted 2.5in and 3.5in SATA Hard Drive Dock

StarTech ID: SATADOCK525

This SATA hard drive dock/docking station can be mounted internally in a 5.25in computer drive bay, to provide simple access to 2.5in or 3.5in SATA hard drives.

Featuring a convenient trayless design, the internal hard drive dock doesn't require that hard drives be mounted in an enclosure, saving time and hassle. Once the docking station is connected to the host computer, it's as simple as inserting the desired SATA hard drive into the slot(s) as needed for full access to the hard drive(s) as though installed conventionally within the computer case.

The HDD dock accommodates both 2.5in and 3.5in SATA hard drives and can support one of each at the same time. Plus, when the 3.5in slot is not in use, two 2.5in drives can be inserted simultaneously. The maximum supported 2.5in hard drive capacity is 500GB.

The 5.25in bay-mounted SATA Hard Drive Dock features front panel power control, allowing you to power the drives on/off as needed.

Features

- Dust resistant door design for extra protection of hard drives
- Front accessible power ON/OFF buttons
- Front power / hard drive activity LED's
- The maximum supported 2.5in hard drive capacity is 500GB
- Unique Patent design for docking station
- Universal 5.25in drive bay mounting

Technical Specifications

- Color: Black
- Connector Types: 2 - SATA Data 7 pin Female
- Connector Types: 2 - SATA Power Female
- Product Height: 1.65 in [42 mm]
- Product Length: 5.71 in [145 mm]
- Carton Quantity: 36
- Shipping (Package) Weight: 15.88 oz [450 g]
- Product Weight: 8.47 oz [240 g]
- Product Width: 4.25 in [108 mm]
- Power Output: 5V, 12A
- WIN OS: XP 32bit & 64bit

Vista 32bit & 64bit

- Max. HD Capacity: 500 GB (2.5in), 2 TB (3.5in)
- LED Indicators: 2 - Power / HD Access
- Number of Drives: One 2.5in and One 3.5in or Two 2.5in SATA hard drives
- Hot Swap Capability: Yes
- Host Connectors: 0 - 7 pin SATA DATA Male
- Host Connectors: 0 - 15 pin SATA Power Male
- **Note:** Hot-swap capabilities are a function of the SATA controller that the dock is connected to. If hot-swappable, then the hard drive can be removed and replaced without the need to restart the operating system.
