

Flexible Digital Signage options that grow along with your Business

Meet StarTech.com's newest digital signage products, designed to optimize video distribution/extension of VGA signals. The Converge AV line offers many cost-effective, high performance solutions. All products are easy to install and offer the quality and reliability needed for the most challenging environments.

CONVERGEAV

ST1214T

4 Port VGA over Cat5 UTP Extender

Connect up to four remote displays from one source. The video signal is sent to remote monitors up to 150m/500' from the source, relying on the cost-effective versatility of standard Cat5 UTP cable.

ST121EXT

VGA over Cat5 UTP Repeater/Extender

This repeater works with the ST121UTP and the ST1214T to further extend transmission distances by an additional 150m / 500'. Used to deliver content to multiple points from a single source, the video signal is sent to remote monitors over standard Cat5 UTP cable, allowing you to add more displays to your digital signage path. Connect up to 32 displays using multiple extenders/repeaters.

ST121R

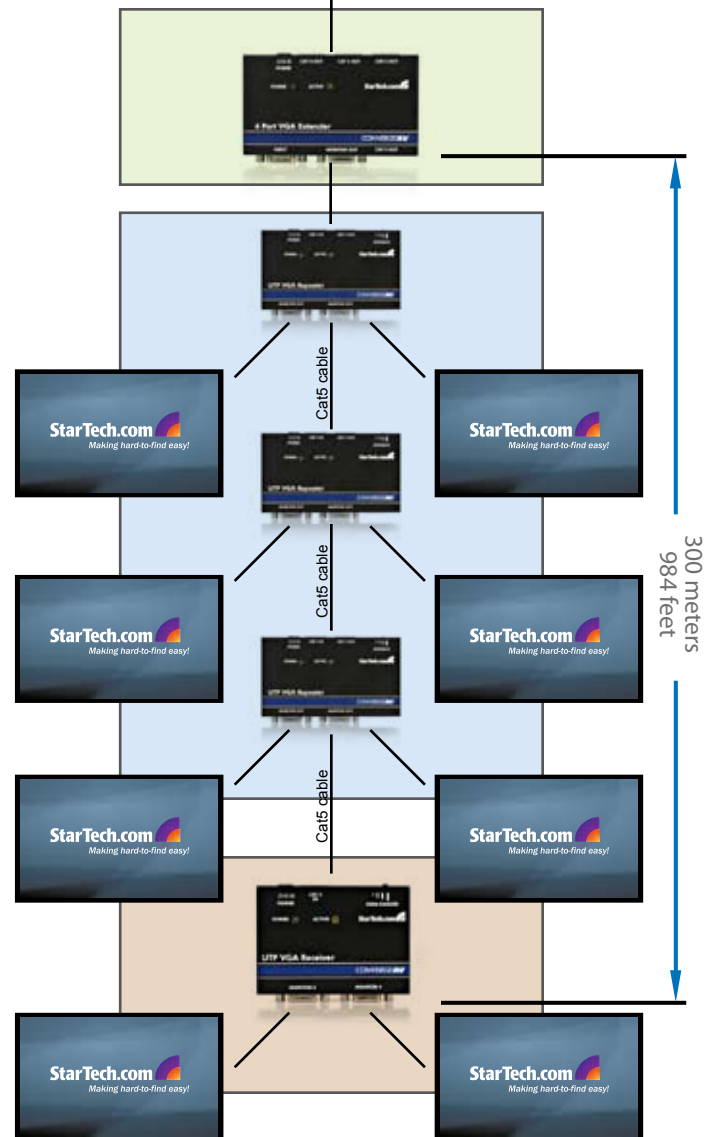

Cat5 UTP Receiver

This receiver works with the ST1214T. Use up to four receivers to connect to remote monitors from one source. The video signal is sent to remote monitors over standard 4 pair Cat5 UTP cable.

SOURCE

PC or other electronic device with VGA out
