

# USB 2.0 to VGA Display Adapters

- Ideal for Internet usage, chatting, and for popular business applications such as Microsoft Office.
- Support for display resolutions of up to 1600 x 1200 (32-bit) and 1920 x 1200 (16-bit)
- Designed for maximum portability, these devices feature a sturdy yet lightweight design
- An excellent addition to any desktop or notebook computer environment

## Why are they convenient?

- Works well with any VGA connected display, and on any PC running Windows 2000, Windows XP, Windows Vista
- Plugs into the host computer system or docking bay in a matter of seconds, quickly helping you get the most out of your PC operating environment
- Eliminates the hassle of installing a second video card
- Provides a simple, cost effective solution that can be used on multiple PCs

\*Note: These products are not intended to be used for 3D games or HD movies.
