

1.8in Micro SATA to Compact Flash Solid State Drive Enclosure Adapter

StarTech ID: CF2USAT18E

This Micro SATA to CompactFlash Enclosure Adapter offers a cost-effective do-it-yourself SSD solution; the adapter functions as a small form factor hard drive enclosure, allowing you to install a CompactFlash card into the enclosure for mounting in a computer in place of a 1.8in Micro SATA (uSATA) hard drive.

The adapter card lets you take advantage of the benefits that Solid State storage has to offer. With no moving parts, an SSD is the ideal addition to virtually any working environment, because it provides cooler and quieter storage than a conventional hard disk drive. Plus, Solid State drives are less susceptible to atmospheric hazards (e.g. dust particles, atmospheric changes etc.), ensuring seamless performance regardless of environmental factors.

A highly reliable storage solution, the Micro SATA to CompactFlash Enclosure Adapter is backed by StarTech.com's free lifetime technical support.

Applications and Solutions

- Replaces 1.8in Micro SATA laptop or notebook hard drive with compact flash card which acts like a bootable solid state (SSD) drive.

Features

- Enclosure connects with Micro SATA data and power cable
- Standard 1.8in hard drive mounting hole positions
- Supports fixed mode and as bootable drive
- Supports single 3.3V CF II and Compact Flash card in either MLC or SLC types. (Note - if MLC CF card, write speed will be slower at 60MB/sec.)

Technical Specifications

- Warranty: 1 Year warranty
- Bus Type: Adapter
- Connector Types: 1 - Micro SATA Male
- Product Height: 1.18 in [30 mm]
- Product Length: 2.95 in [75 mm]
- Carton Quantity: 100
- Shipping (Package) Weight: 9.88 oz [280 g]
- Product Weight: 1.24 oz [35 g]
- Product Width: 2.17 in [55 mm]
- Power Consumption: 5V/150mA
- OS Compatibility: OS independent; No software or drivers required
