

1 ft Standard HDMI® Cable - 1x HDMI (M) to 2x HDMI (F)

StarTech ID: *HDMISPL1HH*

The HDMISPL1HH Standard HDMI® Splitter Cable lets you split the video output from an HDMI-enabled device (DVD player or satellite receiver) to two HDMI-capable displays simultaneously to deliver two identical images of the same resolution.

For best results when splitting an HDMI video signal with the HDMISPL1HH, we recommend that before connecting a second HDMI-capable display, you connect the first display incorporating HDMI technology and wait for the monitor to detect the video signal.

Please note: This device **does not negotiate individual handshakes** between connected devices or pass HDCP data from a connected display back to the video source; if your application requires these functions please refer to our [2-Port High Speed HDMI Video Splitter and Signal Amplifier](#) (ST122HDMI2). **The Standard HDMI Splitter Cable cannot be used to span an image across two displays, or show different images on individual displays.** Similarly, the HDMISPL1HH Standard HDMI Splitter Cable cannot be used to connect two video source devices to a single display.

Built with only the highest quality shielded components and gold-plated connectors to ensure peak performance, our Standard HDMI Splitter Cable is backed by Lifetime Warranty.

Applications

- Connect two HDMI®-capable displays to a single digital HDMI-ready source
- Ideal for use LCD TV, LCD Projectors, Plasma TV, HDTV and DVD Player and set-top box
- Compatible with computers and HDTV video sources (satellite receivers, DVD players, etc) with DVI outputs

Features

- Support for high-resolution images
