

AGP Riser Card for ATX Micro slim cases

StarTech ID: MICROAGPRIS

Do you have to sacrifice performance and expandability to enjoy the size benefits of a Micro-ATX case? StarTech.com doesn't think so. If you need to install full-sized AGP graphics cards in a Micro-ATX or other compatible small form factor case, StarTech.com offers the MICROAGPRIS AGP riser board. This card acts as a transparent adapter that allows you to use high-end graphics controllers in a slim case with no loss of performance or features. The MICROAGPR is an excellent choice for system builders or end-users that want to use a space-saving case design without limiting the choice of video cards they can install in their computers. It is the perfect accessory for StarTech.com's ATXMICRO220 line of cases.
