

IDE to SATA Converter Adapter

StarTech ID: PATA2SATA

Upgrade to SATA speed and performance without overhauling your entire system with the StarTech.com PATA2SATA, an IDE to SATA upgrade kit. This dual channel bridge lets you connect two high-speed SATA drives without the cost and effort of upgrading your IDE (Parallel ATA) motherboard.

With improved airflow inside your case, and enhanced data integrity and security, you get all the benefits of a SATA system at a fraction of the cost. We've included a power connector and a SATA data transfer cable to make your upgrade to SATA even easier.

PLEASE NOTE: If you do not have a Power Supply that Provides you with a SATA Power cable, than you will need to purchase SATAPOWADAP.

Applications and Solutions

- Great for transferring data between IDE devices and Serial ATA hard drives
- Ideal for business and enterprises using a combination of IDE and Serial ATA hard drives

Features

- Accepts Serial ATA commands and then converts them to IDE device commands
- Comes complete with a 12 inch (305 mm) Serial ATA data cable and 7 inch (178 mm) Y-splitter power cable (1 x LP4 connector and 2 x SP4 connectors)
- Supports ATAPI devices (CD/DVD drives, CD/DVD burners, etc...)
- Supports up to 2 channels and 2 devices

Technical Specifications

- Warranty: Lifetime warranty
- Connector A: 2 - SATA Data 7 pin Male
- Connector A: 1 - SP4 Male
- Connector B: 1 - IDC 40 Female
- Carton Quantity: 50
- Industry Standards: Serial ATA 1.0
- Shipping (Package) Weight: 0.27 lb [0.12 kg]
- Data Transfer Rate: Up to 133 MBytes/sec.
- Chipset: Marvell 88i8030-TBC
