

IDE to SATA Converter Adapter

StarTech ID: PATA2SATA

Upgrade to SATA speed and performance without overhauling your entire system with the StarTech.com PATA2SATA, an IDE to SATA upgrade kit. This dual channel bridge lets you connect two high-speed SATA drives without the cost and effort of upgrading your IDE (Parallel ATA) motherboard.

With improved airflow inside your case, and enhanced data integrity and security, you get all the benefits of a SATA system at a fraction of the cost. We've included a power connector and a SATA data transfer cable to make your upgrade to SATA even easier.

PLEASE NOTE: If you do not have a Power Supply that Provides you with a SATA Power cable, than you will need to purchase SATAPOWADAP.

Applications

- Ideal for business and enterprises using a combination of IDE and Serial ATA hard drives
- Great for transferring data between IDE devices and Serial ATA hard drives

Features

- Supports up to 2 channels and 2 devices
- Accepts Serial ATA commands and then converts them to IDE device commands
- Supports ATAPI devices (CD/DVD drives, CD/DVD burners, etc...)
- Comes complete with a 12 inch (305 mm) Serial ATA data cable and 7 inch (178 mm) Y-splitter power cable (1 x LP4 connector and 2 x SP4 connectors)

Technical Specifications

Warranty	Lifetime
Industry Standards	Serial ATA 1.0
Connector A	1 - SP4 (4 pin; Small Drive Power) Male
Connector A	2 - SATA (7 pin; Data) Plug
Connector B	1 - IDE (40 Pin; EIDE/PATA) Female
General Specifications	Marvell 88i8030-TBC
General Specifications	Up to 133 MBytes/sec.
Shipping (Package) Weight	0.3 lb [0.1 kg]
Included in Package	1 - IDE to Serial ATA Hard Drive Adapter
