

## USB to USB Data Transfer Cable for Windows and Mac

StarTech ID: PCMACLINK

The PCMACLINK USB to USB data transfer cable lets you transfer files between two Mac or PC computers over a direct USB 2.0 connection.

The cable features built-in data transfer software that ensures simple PC to PC file transfers, Mac to PC transfers or Mac to Mac transfers, providing a convenient way to transfer files and settings, transfer files to a new computer or simply pass data back and forth quickly and easily between two computers.

In addition to being able to drag and drop files from one PC to another, the USB Data Transfer cable supports Microsoft Outlook e-mail synchronization, file syncing (Windows to Windows) and Internet connection sharing between two computers.
