

Dual Profile PCI Express to 34mm and 54mm ExpressCard Adapter Card

StarTech ID: PEX2ECDP

This PCI Express to ExpressCard adapter adds an ExpressCard slot to a PCI Express capable computer.

A cost-effective solution, the adapter lets you use your 34/54mm form factor ExpressCards (AirCard, wireless broadband card, etc.) on a desktop PC - eliminating the expense of having to buy a desktop specific add-on card (PCI based, etc.).

Designed for use in standard and small form-factor computers, the PCIe to ExpressCard adapter includes both low-profile and standard-sized brackets.

Applications and Solutions

- Use the PCI Express to ExpressCard adapter for your wireless broadband connections and use your internet connection on your laptop or desktop PC.

Features

- No need to buy separate cards for both your laptop and desktop systems, save money and share a single card between both your computers
- Supports both 34 and 54 form factor ExpressCards
- Works with PCI Express slots that provide 3.3V and 1.5V auxiliary power
- USB type B connector or USB 5 - pin header for USB host connection and USB based ExpressCards
- Gives you the option to use the standard or low profile bracket when mounting into your case
- Optional status / control pin headers for advanced signal handling
