

SATA to CF HDD Adapter SAT2CF

Introduction

Thank you for purchasing a StarTech.com SATA to Compact Flash Hard Drive Adapter. Providing a simple solution for notebook users who wish to use a Compact Flash card as a bootable SATA drive, SAT2CF offers a convenient way to swap drives without having to open the host computer.

Features

- Compatible with Compact Flash I/II, MicroDrive™
- Allows Compact Flash card to be used as primary bootable device
- No drivers or software required

System Requirements

- Notebook computer with an available SATA power and data connection
- A Compact Flash card

Package Contents

- 1 x SATA to Compact Flash Adapter
- 1 x Instruction Manual

Installation

Please Note: These instructions require that users open their notebook computer for modification, and assume a general knowledge of computer installation procedures. If you are unfamiliar with the terms used, or procedures described, please contact a computer professional for assistance.

Warning! Be sure that you are properly grounded before opening your computer case or touching any of the contents of the computer. StarTech.com recommends that you wear an anti-static strap when installing any computer component. If an anti-static strap is unavailable, discharge yourself of any static electricity build-up by touching a large grounded metal surface (such as the computer case) for several seconds.

1. Open the computer, exposing the SATA data and power connections. Typically, these connectors will already be attached to the factory installed hard drive.
2. Remove the (installed) hard drive from the computer, by disconnecting the power and data connections mentioned in step #1.
3. Connect the power and data connectors provided by the notebook computer to the SATA power and data connectors on SAT2CF, and fasten the adapter to the notebook. Once the notebook case has been

closed, power on the computer. The inserted Compact Flash card will be recognized as a bootable hard drive.

Specifications

Regulatory Certifications	CE, ROHS
Connectors	1 x SATA (22 pin, data and power) 1 x Compact Flash Slot
Chipset	Marvell 8040
Cards Supported	Compact Flash Type I, II, and MicroDrive

Support, Warranty Information, and Regulatory Compliance Statement
If you ever need help with your product, visit www.startech.com/support and access our comprehensive selection of online tools, documentation, and downloads. This product is backed by a one year warranty. In addition, StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
