

4 Port USB IP Device Server

StarTech ID: USB4000IP

This USB network hub lets you share four USB peripheral devices over an IP network for access from multiple computers.

A simple and cost-effective resource sharing solution, the hub eliminates the need to purchase duplicate peripherals for each computer, by letting you reach USB devices from anywhere on your LAN, overcoming traditional USB cable connection distances.

Applications

- Use multiple USB devices on your local area network allowing them to be shared and used by multiple PC's.

Features

- Easily access your USB devices on multiple PC's
- Traditional USB cable lengths limit you to 15 feet. With USB Ethernet device sharing you can use CAT5 cabling to extend cable lengths to further distances
