

Universal Laptop USB Docking Station with VGA Audio Ethernet

StarTech ID: USBVGADOCK

The USBVGADOCK USB Docking Station offers the combined functionality of a 4-in-1 USB 2.0 device docking station, converting a single USB 2.0 port into multiple connection ports, including a VGA Port, 10/100 RJ45 network port, dual (3.5mm phono) audio ports and 4 additional USB 2.0 ports.

With support for impressive 1600x1200 (32-bit) resolution for connected VGA Monitors, the 4-in-1 VGA dock helps to save time when swapping peripherals from one computer to another.

A definite time-saver, the docking station eliminates the need to disconnect devices like speakers and USB peripherals (scanners, printers, webcams etc.) in order to re-connect them to another computer, instead allowing you to remove the single USB 2.0 connection to the computer, and insert it into an available USB 2.0 port on the secondary computer.

The versatile docking station offers broad operating system compatibility, with support for Windows® 2000, Windows XP, Windows Vista and Windows 7 operating environments, so you can swap the device connections the docking station offers between host computers without having to worry about OS conflicts.
