

# 1U Server Rack Cable-Management Panel

Product ID: CABLMANAGERH

This server rack cable-management panel keeps your rack cables neatly bundled and guided, for tidier rack space. The 1U cable organizer features a combination of D-ring hooks and pass-through holes that enable you to run cables to and from your equipment through the panel and into the hooks.

## **Easily organize your cables for a more manageable server rack**

The rack-cable management panel makes it easier to organize cables from the front or back of your server rack. It features five conveniently placed D-ring hooks that you can use to hold and guide cable bundles running vertically and horizontally. To bundle and route cables through the panel, the cable manager also features four holes designed to seamlessly route cables in and out of your rack.

## **1U design saves U space**

This cable management panel saves rack space with a 1U design. Despite the panel's low-profile it still provides plenty of cable management, with a combination of five D-ring hooks and four cable holes.

## **Protect your equipment**

Routing your cables through a panel reduces the tension that's often put on equipment ports, preventing damage to your expensive rack-mounted devices. Properly routing cables also improves airflow in your server rack, which helps to keep your equipment running at optimal temperatures to reduce the probability of damage caused by your rack overheating.

Note: Power cables may not fit through the holes on this panel.

The CABLMANAGERH is backed by a 5-year StarTech.com warranty and free lifetime technical support.

### Certifications, Reports and Compatibility

### Applications

- Run cables in your rack to the side, in order to improve airflow
- Keep rack-mounted equipment accessible

### Features

- Get hassle-free cable management with pass-thru routing holes that route cables through the panel and into the D-rings
- Save your rack space with a 1U cable manager
- Promote passive cooling in your rack by organizing cables to improve airflow
