This SATA to CF SSD adapter features a SATA male power connector and a SATA male data connector, as well as a Compact Flash port, allowing you to connect a Compact Flash type media card to a laptop computer in place of a serial ATA hard drive.

A Do-it-yourself SSD solution, the CF to SATA adapter allows Compact Flash, Compact Flash 2, or MicroDrive media to be used on a notebook computer as a bootable hard drive and requires no software or driver installation.
Certifications, Reports and Compatibility

Applications
- Convert a CF card into a bootable SATA solid state drive (SSD) for reduced power consumption, greater reliability and reduced heat generation
- Add cost-effective solid state storage to a small form factor or embedded computing solution
- Create a compact SSD for use in volatile environments such as handheld, mobile, or industrial environments

Features
- Compatible with Compact Flash I/II, MicroDrive™
- Small, compact form factor
- No driver of software installation required
